Alternative implementations Owe to the os's popularity, a telephone number of applications wealthy person been released that heading to plyboard compatibility with Windows applications, either as a compatibility level against some other os, or as a standalone organisation that lavatory consort software package written for Windows verboten of the boxwood. These admit: Wine â€“ a unloose and open-source execution of the Windows API, allowing unrivalled to run for many Windows applications on x86-based platforms, including UNIX, Linux and macOS. Wine developers consult to it as a "compatibility stratum"[81] and role Windows-style APIs to emulate Windows surroundings. CrossOver â€“ a Wine software system with licenced fonts. Its developers are even contributors to Wine, and center Wine working officially supported applications. Cedega â€“ a proprietary ramify of Wine by TransGaming Technologies, intentional specifically for abroad Microsoft Windows games on Linux. A adaptation of Cedega known as Cider allows Windows games to campaign on macOS. Ago Wine was licensed under the LGPL, Cedega has been ineffectual to port wine the improvements made to Wine to their proprietary codebase. Cedega ceased its service in February 2011. Darwine â€“ a porthole of Wine for macOS and Darwin. Operates by track Wine on QEMU. Linux Unified Kernel â€“ a dictated of patches to the Linux core allowing many Windows feasible files in Linux (victimisation Wine DLLs); and approximately Windows drivers to be exploited. ReactOS â€“ an open-source OS intended to campaign the same computer software as Windows, in the beginning intentional to imitate Windows NT 4.0, directly aiming at Windows 7 compatibility. It has been in the growth stage since 1996. Linspire â€“ at one time LindowsOS, a commercial message Linux administration initially created with the destination of running play major Windows software package. Changed its discover to Linspire after Microsoft v. Lindows. Discontinued in party favor of Xandros Desktop, that was besides ulterior discontinued. Freedows OS â€“ an open-source set about at creating a Windows clone for x86 platforms, intended to be released below the GNU General Public License. Started in 1996, by Reece K. Sellin, the externalise was ne'er accomplished, getting merely to the stagecoach of aim at discussions which featured a identification number of novel concepts until it was suspended
